Mogadishu, Somalia

Subject: Food inspection and collaboration.

On refer to our previous correspondences relating to food inspection, partnership/implementation. It's TFG decision that there will be no food distribution can take place anywhere in Somalia without being inspected and approved by the government. Hence UN agencies and any other organization that is planning to bring any relief to Somalia should submit the documents for the goods before shipment for checkup.

Any organization that does un-authorized food and non-food items distribution will solely take the responsibility of any bad consequences from the consumption of that distribution.

It is the government decision that any future imported items (whether be food or drug) should go under the government inspection.

Finally, I would like to remind you that it is important you share the implementation and collaboration with the government institutions and an authorized body on the field.

Yours sincerely,

Mohamed Mohamoud Guled.  
Minister for Interior
